

Leapfrog Professional Membership

For the past eleven years, Leapfrog members have enjoyed a host of benefits that have helped them make informed health care decisions for their employees and advocate for improved hospital safety and quality. For the first time in 2012, Leapfrog is proud to offer a new membership category that will grant business professionals the opportunity to become affiliated with The Leapfrog Group. The Leapfrog Professional Membership is a new category of membership intended for professionals from a variety of fields: human resources, medical, public relations, legal, lobbying, policy making, and governing. We are hopeful that individuals from these fields will find the Professional Membership highly valuable to their line of work.

Professional Members will receive similar benefits to other members, including access to member alerts and webinars on health care legislation, the Health Plan Users Groups, and customized data on hospital safety and performance. Professional Members are not eligible for Board nomination, data licensure discounts, or the speaker honorarium waiver. Annual dues for a Professional Member are \$499, and also include free registration for Leapfrog's Annual Meeting.

Professional Memberships are also available to individuals from large companies or organizations that could become Leapfrog members. Under the Professional Membership, the individual, not the company, is classified as a Leapfrog member. For these professionals, Leapfrog Professional Memberships are available only for one year. After that time, the company or organization must join Leapfrog as a member. Membership dues for companies range from \$4,000 - \$10,000, depending on the type of organization.

For questions on the Professional Membership and your eligibility, please contact Erica Newman, Program Manager, at 202.292.6790 or enewman@leapfroggroup.org.
