

## 2022 Leapfrog ASC Survey Overview of Content for ASCs and Stakeholders

The Leapfrog ASC Survey is a free, annual survey that assesses ASC performance on national measures of safety, quality, and efficiency of patient care. These measures are of specific interest to health care purchasers and consumers, and cover a broad spectrum of ASC processes, outcomes, and structures in various aspects of care.

The Leapfrog ASC Survey is closely aligned to Section 10 of the [Leapfrog Hospital Survey](#), which is focused on outpatient surgeries and procedures in hospital outpatient departments (HOPDs).

Several of the measures included on Leapfrog's ASC Survey are aligned with national accreditation standards from organizations such as the Accreditation Association for Ambulatory Health Care (AAAHC) and The Joint Commission (TJC), as well as national reporting entities such as the Centers for Disease Control and Prevention (CDC) and the Centers for Medicare and Medicaid Services (CMS). The table below includes information about which measures are used in one or more of the CMS programs including the Ambulatory Surgery Center Quality Reporting Program (ASCQR).

The Leapfrog ASC Survey provides facilities with the opportunity to benchmark their performance on these national measures against other ASCs and HOPDs in their state and across the nation. Results from the 2022 Leapfrog ASC Survey will be scored and publicly reported on Leapfrog's free public reporting [website](#).

**All of the measures listed below are applicable to Ambulatory Surgery Centers that treat adult patients.**

✓ Check marks indicate measures that are applicable to facilities that treat pediatric patients.
