

Past Performance (Page 2 of 2)

Comparisons of this hospital's 2021 VBP Measure Scores to this hospital's 2020 VBP Measure Scores are shown here. For hospitals that participated in the 2021 Leapfrog Hospital Survey, 2021 VBP Measure Scores are displayed alongside 2020 VBP Measure Scores to allow hospitals to see areas where performance has improved and areas where improvement may still be needed.

2021 ~~2020~~ Measure Score Comparison

- ★★★★ Top Performance Both Years
- ↑ > 10 Points Better
- ± 10 Points
- ↓ > 10 Points Worse
- N/A Not Available
- PENDING VERIFICATION Pending Leapfrog Verification

DOMAIN	MEASURE	2021 VBP MEASURE SCORE	2020 VBP MEASURE SCORE	CHANGE FROM 2021
Maternity Care	Elective Deliveries	100	100	★★★★
	Cesarean Birth	15	13	○
	Episiotomy	41	52	↑
	Newborn Bilirubin Screening Prior to Discharge	100	100	★★★★
	Appropriate DVT Prophylaxis	100	100	★★★★
	High-Risk Deliveries	100	100	★★★★
Pediatric Care	CAHPS Child Hospital Survey	98	97	○
	Pediatric CT Radiation Dose - Head	75	100	↑
	Pediatric CT Radiation Dose - Abdomen/Pelvis	61	37	↓
	Norwood Procedures	85	95	○
Adult Complex Surgery	Carotid Endarterectomy	85	83	○
	Mitral Valve Repair and Replacement	80	89	○
	Open Aortic Procedures	74	100	↑
	Lung Resection for Cancer	95	75	↓
	Esophageal Resection for Cancer	88	87	○
	Pancreatic Resection for Cancer	84	79	○
	Rectal Cancer Surgery	74	95	↑
	Bariatric Surgery for Weight Loss	76	100	↑
	Total Hip Replacement Surgery	74	77	○
	Total Knee Replacement Surgery	76	76	○

Overview of the Leapfrog Value-Based Purchasing Program

This Competitive Benchmarking Report is based on the Leapfrog Value-Based Purchasing (VBP) Program™ methodology.

The Leapfrog Value-Based Purchasing (VBP) Program™ is a comprehensive hospital pay-for-performance program that creates composite scores from the measures on the Leapfrog Hospital Survey and focuses on the most important national patient safety, quality, and resource use standards. This program allows users to benchmark hospital performance nationally, state-wide, and regionally against other hospitals and with hospitals that have similar characteristics, such as bed size, teaching status, type, etc. Performance can be compared by:

- VBP Measure Scores
- VBP Domain Scores
- VBP Value Score

VBP Measure Scores, VBP Domain Scores, and the VBP Value Score are used by employers, purchasers, and health plans to inform network design, recognition programs, and value-based payment programs. VBP data are used by hospitals for internal benchmarking, board and staff engagement, and to inform quality improvement efforts.

Individual hospital data and comparative data from the Leapfrog VBP Program are provided in this Competitive Benchmarking Report. Competitive Benchmarking Reports are only available for hospitals that complete the 2022 Leapfrog Hospital Survey.

Hospitals are assigned a numerical VBP Measure Score for each individual measure on the Leapfrog Hospital Survey, ranging from 0 (worst performance) to 100 (best performance). These individual VBP Measure Scores are each assigned to one of up to seven applicable domains, weighted, and then used to calculate VBP Domain Scores and a VBP Value Score. The standard weight for each domain is included below; for hospitals for which certain domains are not applicable, the weights of the remaining domains are adjusted. This hospital's final weight for each domain is included on the previous pages. Note: For children's hospitals, some domains may not appear on this report if the hospital indicated that they are not applicable.

- Medication Safety (15%): Computerized Physician Order Entry (CPOE), Bar Code Medication Administration (BCMA), and Medication Reconciliation
- Inpatient Care Management (17%): ICU Physician Staffing (IPS), NQF Safe Practice #1 - Culture of Safety Leadership Structures and Systems, NQF Safe Practice #2 - Culture Measurement, Feedback and Intervention, NQF Safe Practice #9 - Nursing Workforce, Hand Hygiene, and Never Events Policy
- Infections (22%): Central-Line Associated Blood Stream Infections (CLABSI) in ICUs and Select Wards, Catheter-Associated Urinary Tract Infections (CAUTI) in ICUs and Select Wards, Surgical Site Infections from Colon Surgery (SSI: Colon), Facility-wide inpatient Methicillin-resistant *Staphylococcus Aureus* (MRSA) Blood Laboratory-identified Events, and Facility-wide inpatient *Clostridium difficile* (C.Diff.) Laboratory-identified Events
- Outpatient Procedures (8%): Patient Recovery – Adult, Patient Recovery – Pediatric, Safe Surgery Checklist, Medication and Allergy Documentation, and Patient Experience (OAS CAHPS)
- Maternity Care (14%): Elective Delivery, Cesarean Birth, Episiotomy, Newborn Bilirubin Screening Prior to Discharge, Appropriate DVT Prophylaxis, and High-Risk Deliveries
- Pediatric Care (10%): CAHPS Child Hospital Survey, Pediatric Computed Tomography (CT) Radiation Dose for Head Scans, Pediatric Computed Tomography (CT) Radiation Dose for Abdomen/Pelvis Scans, and Norwood Procedures
- Adult Complex Surgery (14%): Carotid Endarterectomy, Mitral Valve Repair and Replacement, Open Aortic Procedures, Lung Resection for Cancer, Esophageal Resection for Cancer, Pancreatic Resection for Cancer, Rectal Cancer Surgery, Bariatric Surgery for Weight Loss, Total Hip Replacement Surgery, and Total Knee Replacement Surgery

Measures within each domain are weighted based on the following criteria: Volume (number of patients impacted by the measure), Harm (severity of harm being measured or resulting from hospitals not adhering to the clinical guidelines being measured), and Resource Use (excess costs or avoidance of costs related to the measure).

How to Use this Report

This Competitive Benchmarking Report is based on the Leapfrog Value-Based Purchasing (VBP) Program™ Methodology.

Leapfrog's Competitive Benchmarking Reports summarize and benchmark hospitals' Leapfrog Hospital Survey Results. The reports are designed to help hospitals present their Survey Results in an easy-to-understand format to engage multiple stakeholder groups, including medical staff, administrators, front-line caregivers, and boards of directors. In addition to summarizing performance on up to 39 national measures of safety, quality, and efficiency, the reports can be used to highlight areas of excellence and identify areas for improvement.

To take full advantage of the features of this report, hospitals should:

- Use the color-coded VBP Measure Scores to identify areas of excellence and opportunities for improvement
- Use the color-coded VBP Measure Scores to prioritize quality improvement initiatives
- Use the VBP Measure Scores and VBP Domain Scores to engage hospital leadership in a dialogue around performance on quality and safety
- Use the cohort, state, and national averages to set goals for improvement
- Use the overall VBP Value Score and decile ranking to set goals for improvement

In some markets, health plans are utilizing the Leapfrog VBP Program as a pay-for-performance or financial reward tool. Hospitals interested in securing financial recognition for their participation in and performance on the Leapfrog Hospital Survey should speak with their contracted health plans about opportunities to implement the Leapfrog Value-Based Purchasing Program.
