This Summary report uses Leapfrog’s Custom Benchmarking Report (CBR) methodology to calculate numerical scores from 0 (worst performance) to 100 (best performance) for each of the applicable 45 measures on the Leapfrog Hospital Survey. Each measure is then assigned to one of the eight Domains displayed above, and a Domain Score is calculated using the same 0-100 scale. The Domain Scores are then aggregated for an

Overall Score of 1-100, which represents your hospital's overall performance on the 2025 Leapfrog Hospital Survey.

For hospitals that are interested in using their Leapfrog Hospital Survey Results for targeted quality improvement and for engaging with their hospital leadership and staff, [Premium Custom Benchmarking Reports](#) are available to purchase. For more **detailed, comparative performance information**, the Premium report includes:

- State, national, and custom cohort benchmarks for each measure and domain
- Comparison to previous year's Survey Results to show changes in performance by measure
- A PowerPoint presentation to help you communicate your results with hospital leadership and board of directors
- Custom cohorts to compare your hospital's performance to a custom group of hospitals, including bed size, region, safety net designation or teaching facility status

Our NEW Premium PLUS report is also now available. Get valuable insight from a Leapfrog expert who will contextualize your data, identifying problem spots and opportunities for strategic improvement. This **tailored analysis** is delivered in an **executive report** and during a one-hour **live review session**, followed by a **Q&A**.
